

Definition of conceptual framework: *Being able to meet one's daily needs within a 20 minute walk.*

If this is the Scottish Government definition, we need to ask:

How do rural and island residents identify with it?

Priorities in rural and island place-making:

Implementing Priorities:

- Work with the Development Trust Association of Scotland to re-define the 20 Minute Neighbourhood conceptual framework so it is relevant to both urban and rural contexts.
- Develop 20 Minute Neighbourhood mapping systems that are grounded in the lived reality of local communities.
- Invest in paid staff (+ core costs) to support local communities in conducting inclusive consultations, finding consensus on local priorities and implementing these in partnership with others.
- Proactively map and identify communities that may require additional support to achieve above.
- Invest in expert organisations who can enable local communities to shape the National Planning Framework (NPF4) development and implementation process.
